

BTBFRC - L (Macro) >> COATED

Brown Fused Aluminum Oxide

BTBFRC is a brown fused aluminum oxide obtained from the fusion of high purity bauxites in electric arc furnaces. BTBFRC is heated at high temperatures, the grits turn blue and increasing toughness due to their controlled chemistry. The grits are ceramic coated, which provides an increase in the specific surface of the abrasive grain and a better adhesion between the abrasive grain and resin. Produced according to ANSI or FEPA-P.
